

Hearing Loop
Switch hearing aid to T-coil

Hearing Loop Installed

St. Michael has a Hearing Loop installed in the church to assist those with hearing loss hear more clearly during services. A Hearing Loop is an assistive listening system that transmits sound directly into one's hearing aids or cochlear implants rather than depending on sound coming from the loudspeakers. To receive the Loop signal and hear more clearly, manually activate your T-coil or telephone setting on your hearing aid or cochlear implant. If you don't know if you have a T-coil or whether yours is properly programmed, consult with your audiologist or hearing aid professional. If you don't wear hearing aids, ask to use a Loop receiver to receive the sound.
